

Qiazhi-Bazi V1 Logic Stability Report
Scenario Count: 100
Polarity Reversal Accuracy: 100.00%
High Tension Cases (tension>0.8): 65
Zone Distribution: RED=67 YELLOW=0 BLUE=33

Sample Cases:

Case#1: zone=RED, tension=0.964, expected_reversal=True, predicted_reversal=True
Case#2: zone=RED, tension=0.858, expected_reversal=True, predicted_reversal=True
Case#3: zone=RED, tension=0.981, expected_reversal=True, predicted_reversal=True
Case#4: zone=BLUE, tension=0.000, expected_reversal=False, predicted_reversal=False
Case#5: zone=BLUE, tension=0.000, expected_reversal=False, predicted_reversal=False

Conclusion:

Conflict evaluator remains stable under synthetic extreme polarity stress.
